Summary

Senior Full Stack Engineer with 8+ years building production applications serving 100k+ users. Recent work centers on agentic AI: MCP servers, agent tool layers, and the evaluation systems that measure them. Led engineering teams delivering AI-powered platforms, 3D web experiences, and blockchain solutions. Optimizes web and 3D graphics performance--reduced web-app load time by 75% and build times from 30 minutes to under 10 minutes. Expert across modern frontend (React, TypeScript, Three.js), backend (Python, FastAPI, Node.js), and cloud infrastructure (AWS, Docker, CI/CD).

Technical Skills

Languages: Python, JavaScript, Typescript, PostgreSQL, HTML/CSS

Frontend: React, Next.js, Three.js, React Three Fiber, Tailwind, WebGL

Backend: FastAPI, Node.js, Express, Flask, GraphQL, tRPC, REST API, WebSockets

AI & Agents: MCP (Model Context Protocol), agentic AI, LLM evals, LangChain, RAG, Claude Code, GPT-4, Gemini

Cloud & Infrastructure: AWS (Lambda, S3, EC2, RDS, SQS), Docker, Vercel, Firebase

DevOps & CI/CD: GitHub Actions, CI/CD pipelines, serverless architecture

Media & Processing: FFmpeg, PIL (Pillow), Blender scripting (Python)

Data & Caching: Redis, ETL pipelines, boto3

Tools & Auth: Git, Auth0, Figma, Storybook, Linear, Confluence, JIRA

Professional Experience

TwelveLabs

Senior Full Stack Engineer

Remote (Los Angeles)

April 2026 - August 2026

- Built the agentic video editor UI for Rodeo, TwelveLabs' first application-layer product, using React, Next.js, Tailwind, and Storybook
- Built backend agent tools and GraphQL API integrations powering server-side video export via FFmpeg
- Built evaluation systems for both agentic surfaces, the video editor and the Rodeo chatbot, to measure agent quality across releases
- Worked the full vertical of an agentic product: user-facing surface, agent tool layer, and evaluation harness

First Resonance

AI Context Engineer

Los Angeles, CA

December 2025 - April 2026

- Joined as the company's first AI engineer, establishing the AI engineering practice from scratch
- Built an MCP server exposing manufacturing and supply-chain operations, used to help identify production bottlenecks
- Built internal Claude Code infrastructure (skills, rules, automated tooling) enabling company-wide AI-assisted engineering
- Built an LLM agent (Python, LangChain) for the company website, running on the same custom MCP server

Napster Inc.

Senior Full Stack Developer

Remote (Los Angeles)

March 2025 - July 2025

- Engineered WebGL instancing system rendering 10,000+ 3D objects at 60 FPS on mobile devices
- Architected component library of 40+ React components with Storybook testing pipeline, reducing development time by 50% across 3 engineering teams
- Optimized Three.js rendering using custom shaders and instanced geometry patterns, enabling smooth avatar navigation and touch controls in complex 3D environments on mobile browsers

Looking Glass Factory

Senior Full Stack Developer

Remote (Los Angeles)

May 2023 - March 2025

- Scaled content management platform to serve 100,000+ digital assets using GraphQL, tRPC, and Next.js, reducing page load times by 70% through optimized PostgreSQL queries
- Engineered RAG-powered AI assistants using Python, LangChain, and GPT-4, delivering immersive experiences for enterprise clients, including Accenture and Marriott
- Architected and launched the company's first subscription service, integrating Stripe and Shopify APIs to secure 100+ paying subscribers at launch
- Spearheaded Gen AI text-to-3D hologram service using Python, Docker, FastAPI, and Modal, delivering months ahead of schedule

Parcel

Senior Full Stack Developer

Remote (Los Angeles)
March 2022 - January 2023

- Integrated Web3 libraries (ethers.js) and multi-wallet support (MetaMask, Coinbase, Magic) supporting 10k+ wallet connections
- Designed and implemented checkout UI/UX workflows for cross-metaverse asset management and NFT transactions, supporting major platforms including Decentraland and The Sandbox
- Automated CI/CD pipelines with GitHub Actions, cutting build and deployment times from 45 minutes to 15 minutes

Vertebrae Inc. (acquired by Snap Inc.)

Full Stack Developer

Remote (Los Angeles)
August 2020 - March 2022

- Architected end-to-end 3D asset pipeline using Python, FastAPI, and AWS (S3, Lambda, SQS), automating Blender processing and cloud storage for scalable AR virtual try-on
- Scaled Python-based ETL pipelines to process 50,000 digital media assets with 95% automation, accelerating company throughput 3x and directly contributing to acquisition by Snap Inc.
- Enhanced high-volume CMS (PostgreSQL, REST) supporting 50,000+ 3D assets and 1,000+ users by implementing backend controls for customizable asset processing

Genies

Senior Unity Developer

Los Angeles, CA
January 2020 - August 2020

- Developed Python microservices for 3D asset pipelines, reducing artist integration time from weeks to under 30 minutes and enabling in-app DLC using Unity Asset Bundles
- Led technical planning and design for key product features, including a 3D avatar customization system, an e-commerce cosmetic shop, and cross-platform sharing

PortalsXR

Lead Unity Developer

Los Angeles, CA
January 2019 - January 2020

- Led a cross-functional team of 6 to successfully launch 6 mobile applications to the app store for high-traffic live events
- Provided on-site production support for high-traffic events, including Coachella, ensuring 100% uptime for localized, time-coded AR experiences

Moving Picture Company

Unity Developer

Los Angeles, CA
February 2018 - February 2019

- Delivered interactive AR/VR experiences for high-profile clients, including National Geographic, building Unity applications with C#
- Collaborated with Magic Leap engineering team to extend SDK capabilities for spatial audio features in Spotify application prototype using C++

EDUCATION

Polkadot Blockchain Academy - Bali

September 2025

DApps Development

Disguise Virtual Production Accelerator - Los Angeles

March 2023

University of California, Davis

June 2015

Technocultural Studies B.A. | Film & Television B.A.
